KANITHI SATYA SATHVIK

AI Engineer | SDE Intern at Logikality

+91 9515136729 Bengaluru, India kanithisathvik@gmail.com

LinkedIn LeetCode GitHub Portfolio

Summary

AI Engineer with hands-on experience in LLM applications, Retrieval-Augmented Generation (RAG), NLP, and AI product engineering. Skilled in building AI workflows, semantic search systems, FastAPI services, and machine learning applications. Currently working as an SDE Intern at Logikality, developing Playwright automation, validating business workflows, and documenting reproducible defects. Focused on building reliable, testable AI systems.

Skills

Programming: Python, Java, SQL, JavaScript, HTML, CSS

LLM/NLP: RAG, Hugging Face Transformers, DeBERTa-v3, Sentence Transformers, Embeddings, Semantic Search, Similarity Scoring, LLM Agents, Prompt Engineering

AI/ML: Machine Learning, Deep Learning, XGBoost, SVM, LSTM, Reinforcement Learning, DQN, PPO, SARSA, Time-Series Forecasting, Model Evaluation

Frameworks: FastAPI, Flask, Streamlit, React, TensorFlow, PyTorch, scikit-learn

Data/Tools: Pandas, NumPy, FAISS, ChromaDB, MySQL, SQLite, Git, GitHub, Jupyter, Playwright, End-to-End Testing, Test Automation

Experience

SDE Intern May 2026 – Present

Logikality, Bengaluru

- Translate LogikIntake and Title Intelligence business rules into testable scenarios and QA workflows.
- Develop Playwright page objects and end-to-end test specifications for application workflows.
- Prepare document dataset packets and investigate classification, page-stacking, and workflow defects.

Projects

NeuroResearch – Autonomous AI Research Engine GitHub

- Built an AI research assistant combining RAG, local document retrieval, and live web intelligence.
- Integrated retrieval and LLM-based reasoning to generate structured research responses.

Trao – AI Interview Prep Kit GitHub Live

- Built and deployed a full-stack interview preparation platform and Implemented authentication, persistent user-owned data, REST APIs, schema validation, and structured error handling.
- Developed and verified application workflows including editing, regeneration, persistence, and authentication.Deployed the frontend on Vercel and backend on Render, with MongoDB Atlas for persistence.

SniperThink – Real-Time Voice AI GitHub

- Built a voice assistant using WebRTC, Silero VAD, Faster-Whisper ASR, and an LLM fallback chain.
- Achieved reported response latency below 800 ms while incorporating fallback handling for provider failures.

Aspect-Based Sentiment Analysis Hugging Face

- Fine-tuned a DeBERTa-v3 transformer for aspect-level sentiment classification.
- Built and deployed an NLP inference application on Hugging Face Spaces.

Education

B.Tech, Computer Science and Engineering (AI & ML), VIT-AP University 2022–2026

CGPA: 8.45/10

Intermediate, Sri Chaitanya Junior College 2020–2022

Percentage: 90.7%

Certifications

Oracle Cloud Infrastructure 2025 – Generative AI Certified Professional (Credential) AI Coder: Complete Claude Code & Coding Agents Course – Udemy, June 2026

AI Engineer Production Track: Deploy LLMs Agents at Scale – udemy , October 2026

Leadership

Machine Learning Club Member, VIT-AP University 2023–2024 Supported AI workshops, peer learning sessions, and collaborative technical projects.
