KANITHI SATYA SATHVIK

AI/ML Engineer | Machine Learning | NLP

+91 9515136729 Bengaluru, India

Email LinkedIn GitHub LeetCode Portfolio

SUMMARY

AI/ML Engineer with hands-on experience developing machine learning models, NLP applications, LLM-powered systems, and retrieval-augmented generation (RAG) pipelines. Skilled in Python, data preprocessing, feature engineering, model evaluation, transformers, semantic search, and API-based AI deployment. Experienced in applying AI to resume screening, research automation, healthcare prediction, and environmental forecasting. Currently an SDE Intern at Logikality, contributing to AI workflow validation, test automation, and quality engineering.

TECHNICAL SKILLS

Programming: Python, SQL, Java

Machine Learning: Classification, Regression, Random Forest, XGBoost, SVM, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning

Deep Learning: Neural Networks, LSTM, TensorFlow, PyTorch

NLP and LLMs: Hugging Face Transformers, DeBERTa-v3, Sentence Transformers, Embeddings, Semantic Search, Similarity Scoring, RAG, LLM APIs, Prompt Engineering

Data Science: Pandas, NumPy, scikit-learn, EDA, Data Cleaning, Data Visualization, Matplotlib, Seaborn, Excel, Power BI, Looker Studio

Frameworks and Tools: FastAPI, Flask, Streamlit, FAISS, ChromaDB, Git, GitHub, Jupyter Notebook, VS Code

EXPERIENCE

SDE Intern May 2026 – Present

Logikality, Bengaluru

- Translate LogikIntake and Title Intelligence business rules into testable scenarios for AI-powered document-processing workflows.
- Develop Playwright page objects and end-to-end tests to validate classification and application workflow behavior.
- Prepare document test datasets and investigate classification, page-stacking, and processing defects.
- Contribute to QA strategy, requirements clarification, and reproducible defect documentation.

PROJECTS

AI Resume Screening System GitHub

- Developed an NLP-based resume screening pipeline using TF-IDF and cosine similarity to match resumes against job descriptions.
- Evaluated the system on 200+ resumes and reported a 60% reduction in candidate shortlisting time.

NeuroResearch – Autonomous AI Research Engine GitHub

- Built a research assistant combining RAG, document processing, semantic retrieval, and live web search to generate grounded responses.
- Integrated FAISS, sentence-transformer embeddings, Tavily, and OpenAI/Groq APIs with modular retrieval and research workflows.

Heart Disease Prediction GitHub

- Developed and evaluated machine learning classification models on 1,000+ healthcare records, including data preprocessing and feature engineering.
- Reported 90% model accuracy on the evaluated dataset.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML), VIT-AP University 2022 – 2026

CGPA: 8.45/10

Intermediate, Sri Chaitanya Junior College 2020 – 2022

Percentage: 90.7%

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 – Generative AI Certified Professional (Credential)

AI Coder: Complete Claude Code & Coding Agents Course – Udemy, June 2026

LEADERSHIP

Machine Learning Club Member, VIT-AP University 2023 – 2024

Supported AI workshops, peer learning sessions, and collaborative technical projects.
