KANITHI SATYA SATHVIK

Frontend Developer | Full-Stack Software Engineer

Bengaluru, India | +91 9515136729 | kanithisathvik@gmail.com
Portfolio | GitHub | LinkedIn | LeetCode

Professional Summary

Software Engineer experienced in building and deploying web applications with React, TypeScript, JavaScript, Node.js, Express, Python, and REST APIs. Hands-on experience with authentication, database integration, API validation, automated testing, debugging, and cloud deployment. Strong interest in frontend engineering, full-stack product development, and delivering reliable applications from implementation through production.

Technical Skills

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Design, Vite
Backend: Node.js, Express.js, Python, FastAPI, REST APIs, Third-Party API Integration
Databases: MongoDB Atlas, SQL, Data Modelling
Testing: Playwright, Vitest, Supertest, E2E Testing, API Testing, Debugging
Security & Validation: bcrypt, Session Management, Zod, Input Validation, User-Scoped Data Access
Deployment & Tools: Git, GitHub, Vercel, Render, Environment Configuration, CI/CD Fundamentals

Experience

Software Development Engineer Intern | Logikality *May 2026 – Present*
Bengaluru, India

- Translate product requirements and business rules into testable scenarios for LogikIntake and Title Intelligence.
- Develop Playwright page objects and end-to-end test specifications to validate application workflows.
- Investigate interface, document-processing, classification, and workflow defects; document reproducible steps and coordinate fixes with the team.
- Contribute to QA strategy, requirement clarifications, bug tracking, technical documentation, and demo scenarios.

Projects

Trao – AI Interview Prep Kit *Full-Stack Web Application*
Live Demo | GitHub | *React 19, TypeScript, Node.js, Express, MongoDB, Vite*

- Built and deployed a full-stack application with a React frontend, Express backend, and MongoDB Atlas persistence.
- Implemented password hashing, revocable hashed sessions, user-scoped data access, and request validation with Zod.
- Developed API-driven interview preparation features, including company research, question generation, flashcards, mock interviews, and readiness tracking.

NeuroResearch – Autonomous AI Research Engine *Deployed Web Application*
Live Demo | *Python, Streamlit, APIs, Semantic Search, RAG*

- Built and deployed a research application combining uploaded-document retrieval with live web search.
- Implemented PDF, TXT, and Markdown ingestion, text chunking, embeddings, semantic retrieval, and source attribution.
- Integrated AI and search providers with fallback handling to support research and document-question-answering workflows.

Aspect-Based Sentiment Analysis *Deployed ML Web Application*
Live Demo | *Python, Transformers, DeBERTa-v3, Hugging Face*

- Built and deployed an interactive NLP application for aspect-level sentiment analysis using a fine-tuned DeBERTa-v3 transformer model.
- Connected model inference to a web interface so users can explore sentiment predictions for different text inputs.

Personal Developer Portfolio *Frontend Development*
Live Portfolio | GitHub Profile

- Designed and deployed a responsive portfolio showcasing projects, skills, experience, and live application demos.
- Created a consistent visual identity, clear navigation, and interactive project sections to improve discoverability.

Education

VIT-AP University *2022 – 2026*
B.Tech, Computer Science and Engineering (AI & ML) CGPA: 8.45/10
Sri Chaitanya Junior College *2020 – 2022*
Intermediate 90.7%

Certifications & Leadership

- Oracle Cloud Infrastructure 2025 – Generative AI Certified Professional.
- AI Coder: Complete Claude Code & Coding Agents Course – Udemy, June 2026.
- AI Engineer Production Track: Deploy LLMs & Agents at Scale – Udemy, October 2026.
- Machine Learning Club, VIT-AP University – Member; supported technical workshops and peer learning, 2023–2024.
