SUMMARY

Computer Science graduate specializing in AI and Machine Learning, with hands-on experience in data preprocessing, exploratory data analysis, feature engineering, predictive modeling, and SQL-based analytics. Skilled in Python, Pandas, NumPy, scikit-learn, and data visualization. Experienced in building end-to-end data workflows for environmental forecasting, healthcare prediction, and business analytics.

TECHNICAL SKILLS

Programming: Python, SQL, Java

Data Engineering: ETL Concepts, Data Ingestion, Data Cleaning, Data Transformation, Data Validation, Data Processing, Feature Engineering, Relational Databases

Data Analysis: Exploratory Data Analysis (EDA), Statistical Analysis, Data Aggregation, Data Visualization, Trend Analysis, Business Intelligence

Machine Learning: Regression, Classification, Decision Trees, Random Forest, XGBoost, Support Vector Machines (SVM), Model Evaluation, Cross-Validation, Time-Series Forecasting

Libraries and Frameworks: Pandas, NumPy, scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn, Streamlit

Databases and Tools: MySQL, SQLite, Excel, Power BI, Git, GitHub, Jupyter Notebook

EXPERIENCE

SDE Intern May 2026 – Present
Logikality, Bengaluru

- Translate business rules into testable scenarios for document-processing and AI-powered workflows.
- Develop Playwright page objects and end-to-end tests to validate application behavior and data workflows.
- Prepare document dataset packets and investigate classification, page-stacking, and processing defects.

PROJECTS

AQI Forecasting and Data Analysis GitHub

- Processed three years of air-quality data through data cleaning, transformation, exploratory analysis, and feature engineering.
- Developed regression and time-series forecasting models and reported 85% forecasting accuracy.
- Built a Streamlit dashboard to present forecasts and support environmental data analysis.

Insurance Risk Analytics GitHub Profile

- Analyzed 1 million simulated insurance records using Python, Pandas, SQL, and Power BI to investigate policy risk and profitability.
- Used SQL queries and data aggregation to examine trends and create visual summaries for business analysis.

Heart Disease Prediction GitHub

- Built a machine learning workflow using 1,000+ healthcare records, including preprocessing, feature engineering, model training, and evaluation.
- Evaluated classification models and reported 90% accuracy on the evaluated dataset.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML) 2022 – 2026
VIT-AP University
CGPA: 8.45/10

CERTIFICATIONS

Oracle Cloud Infrastructure 2025
Generative AI Certified Professional (Credential)

Complete AI & Machine Learning, Data Science Bootcamp – Udemy, November 2025

LEADERSHIP

Machine Learning Club Member, VIT-AP University 2023 – 2024

Supported AI workshops, peer learning sessions, and collaborative technical projects.
