KANITHI SATYA SATHVIK

Product Intern | Associate Product Manager | AI Products

Bengaluru, India | +91 9515136729 | kanithisathvik@gmail.com
Portfolio | GitHub | LinkedIn | LeetCode

Summary

Product-minded Computer Science graduate with experience translating business requirements into testable workflows, clarifying product requirements, analyzing application behaviour, and coordinating quality improvements. Builds and deploys AI-powered applications, combining technical execution with product documentation, user journeys, and structured testing. Interested in product discovery, feature definition, product analytics, and customer-focused software.

Core Skills

Product: PRDs, Requirements Clarification, User Stories, Acceptance Criteria, Feature Scoping, User Workflows, Edge Cases
Execution: Feature Validation, Bug Prioritization, Release Readiness, Stakeholder Communication, Demo Planning
Quality: Test Scenarios, E2E Testing, Defect Analysis, Regression Testing, AI Output Evaluation
Technical: SQL, Python, JavaScript, React, REST APIs, MongoDB, FastAPI, Git, Playwright
AI Products: LLM Applications, RAG, AI API Integration, Prompt Evaluation, Human-in-the-Loop Workflows

Experience

Software Development Engineer Intern | Logikality *May 2026 – Present*
Bengaluru, India

- Translate business rules and product requirements for LogikIntake and Title Intelligence into testable scenarios and user workflows.
- Contribute to PRD clarifications by identifying ambiguous requirements, edge cases, and expected application behaviour.
- Analyze classification, page stacking, validation, and workflow issues; document defects and coordinate fixes.
- Develop Playwright page objects and end-to-end tests to validate critical product journeys and improve release confidence.
- Prepare test datasets, QA strategy documentation, and structured scenarios for product demonstrations.
- Collaborate with product and engineering stakeholders to align implementation and testing with intended business rules.

Selected Product Projects

Trao – AI Interview Prep Kit *Full-Stack AI Product*
Live Demo | GitHub

- Built and deployed an interview preparation product using React, TypeScript, Node.js, Express, and MongoDB.
- Developed user journeys for company research, question generation, flashcards, mock interviews, and readiness tracking.
- Implemented authentication, user-scoped data access, request validation, and automated tests.

NeuroResearch – AI Research Assistant *Deployed Web Application*
Live Demo | GitHub

- Built a research application combining uploaded documents with live web search and multiple research modes.
- Implemented document ingestion, semantic retrieval, source attribution, and provider fallback handling.

SniperThink – Real-Time Voice AI *AI Product Prototype*
GitHub

- Developed a voice AI system combining speech detection, transcription, and model-response components.
- Focused on real-time interaction, latency, and fallback behaviour across supported processing components.

Aspect-Based Sentiment Analysis *Deployed NLP Application*
Live Demo

- Built an interactive application using a fine-tuned DeBERTa-v3 transformer for aspect-level sentiment classification.
- Connected model inference to a usable interface, packaging NLP capabilities into an accessible product experience.

Education

VIT-AP University *2022 – 2026*
B.Tech, Computer Science and Engineering (AI & ML) CGPA: 8.45/10
Sri Chaitanya Junior College *2020 – 2022*
Intermediate 90.7%

Certifications & Leadership

- Oracle Cloud Infrastructure 2025 – Generative AI Certified Professional.
- AI Coder: Complete Claude Code & Coding Agents Course – Udemy, June 2026.
- Machine Learning Club, VIT-AP University – Member; supported technical workshops and peer learning, 2023–2024.
