SUMMARY

Software Development Engineer with hands-on experience in backend development, REST APIs, full-stack applications, automated testing, and AI-powered software systems. Proficient in Python, JavaScript, TypeScript, SQL, FastAPI, Node.js, React, and Git. Currently working as an SDE Intern at Logikality, building Playwright end-to-end tests, translating business requirements into test scenarios, and investigating reproducible application defects. Interested in building maintainable, reliable, and scalable software.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL
Backend Development: Node.js, Express.js, FastAPI, Flask, REST APIs, API Validation, Authentication, Error Handling
Frontend Development: React, HTML, CSS, Responsive Web Applications
Databases: MongoDB, MySQL, SQLite, Relational Data Modeling
Testing and Quality Engineering: Playwright, End-to-End Testing, API Testing, Vitest, Supertest, Test Automation, Debugging, Regression Testing, Page Object Model
Tools and Deployment: Git, GitHub, Docker, Vercel, Render, Jupyter, VS Code, CI/CD Fundamentals
Additional Technologies: FastAPI-based AI applications, LLM APIs, RAG, Embeddings, Semantic Search

EXPERIENCE

SDE Intern May 2026 – Present
Logikality, Bengaluru

- Translate LogikIntake and Title Intelligence business requirements into testable scenarios and application workflow validations.
- Develop Playwright page objects and end-to-end test specifications to verify application behavior.
- Prepare document test datasets and investigate classification, page-stacking, and workflow defects.
- Document reproducible bugs and contribute to QA strategy, requirements clarification, and product demonstration scenarios.

PROJECTS

Trao – AI Interview Prep Kit GitHub

- Built and deployed a full-stack interview preparation platform using React, TypeScript, Node.js, Express, and MongoDB.
- Implemented authentication, persistent user-owned data, REST APIs, schema validation, and structured error handling.
- Developed automated tests using Vitest and Supertest; verified application workflows including editing, regeneration, persistence, and authentication.
- Deployed the frontend on Vercel and backend on Render, with MongoDB Atlas for persistence.

SniperThink – Real-Time Voice AI GitHub Profile

- Built a real-time voice assistant using Python, FastAPI, WebRTC, Silero VAD, and Faster-Whisper.
- Integrated LLM provider fallbacks and rule-based responses; reported response latency below 800 ms.

InsightRecruiter – AI Resume Screening Platform GitHub

- Developed a resume-screening application using FastAPI, embeddings, semantic similarity, and LLM-based candidate evaluation.
- Evaluated the workflow on 200+ resumes and reported a 60% reduction in shortlisting time.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML), VIT-AP University 2022 – 2026
CGPA: 8.45/10

Intermediate, Sri Chaitanya Junior College 2020 – 2022
Percentage: 90.7%

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 – Generative AI Certified Professional (Credential)
AI Coder: Complete Claude Code & Coding Agents Course – Udemy, June 2026

LEADERSHIP

Machine Learning Club Member, VIT-AP University 2023 – 2024
Supported technical workshops, peer learning sessions, and collaborative projects.
